

North Port Oval Redevelopment

Project fact sheet

Council is undertaking a project to upgrade facilities at North Port Oval in Port Melbourne. The reserve is a vital part of the Port Melbourne open space network and holds historical significance for the sporting community. While enhancing the functionality for sporting activity, the redevelopment will also assist in improving the overall community benefit, including improved access to the reserve and sporting facilities.

Background

Council consulted the local community in 2009 and 2010 on plans for North Port Oval. Plans exhibited for comment in late 2010 have now been revised to meet budget. We are pleased that these new plans still provide the same community benefits.

New design features

Site A: Social and Football Club Administration Facility and associated landscaping

- single storey
- club administration offices and storage
- function room
- meeting/conference room
- kitchen facilities
- new entry from Ingles Street
- landscaping around the facility
- an accessible footpath

Site B: Norman Goss Grandstand and Visitors change room renewal

- upgrade of current facilities to comply with AFL Victoria facility standards, including improved change rooms, medical rooms and umpires facilities
- improvement to grandstand

Site C: Synthetic Cricket Practice Nets

- three bay synthetic cricket net structure, which will be accessible to the public and fully enclosed to prevent balls entering Williamstown Road and Ingles Street

Trees

The construction of the Social and Administration facility and the Synthetic Cricket Practice Nets will require the removal of six trees. These trees will be replaced by 24 new trees on the site through new landscaping works.

Construction

Works are scheduled for 2012/2013 and Council will work with clubs and adjoining residents to keep disruption to a minimum.
