

Part 4 of 4

Detail Concepts

4a Town Hall Forecourt

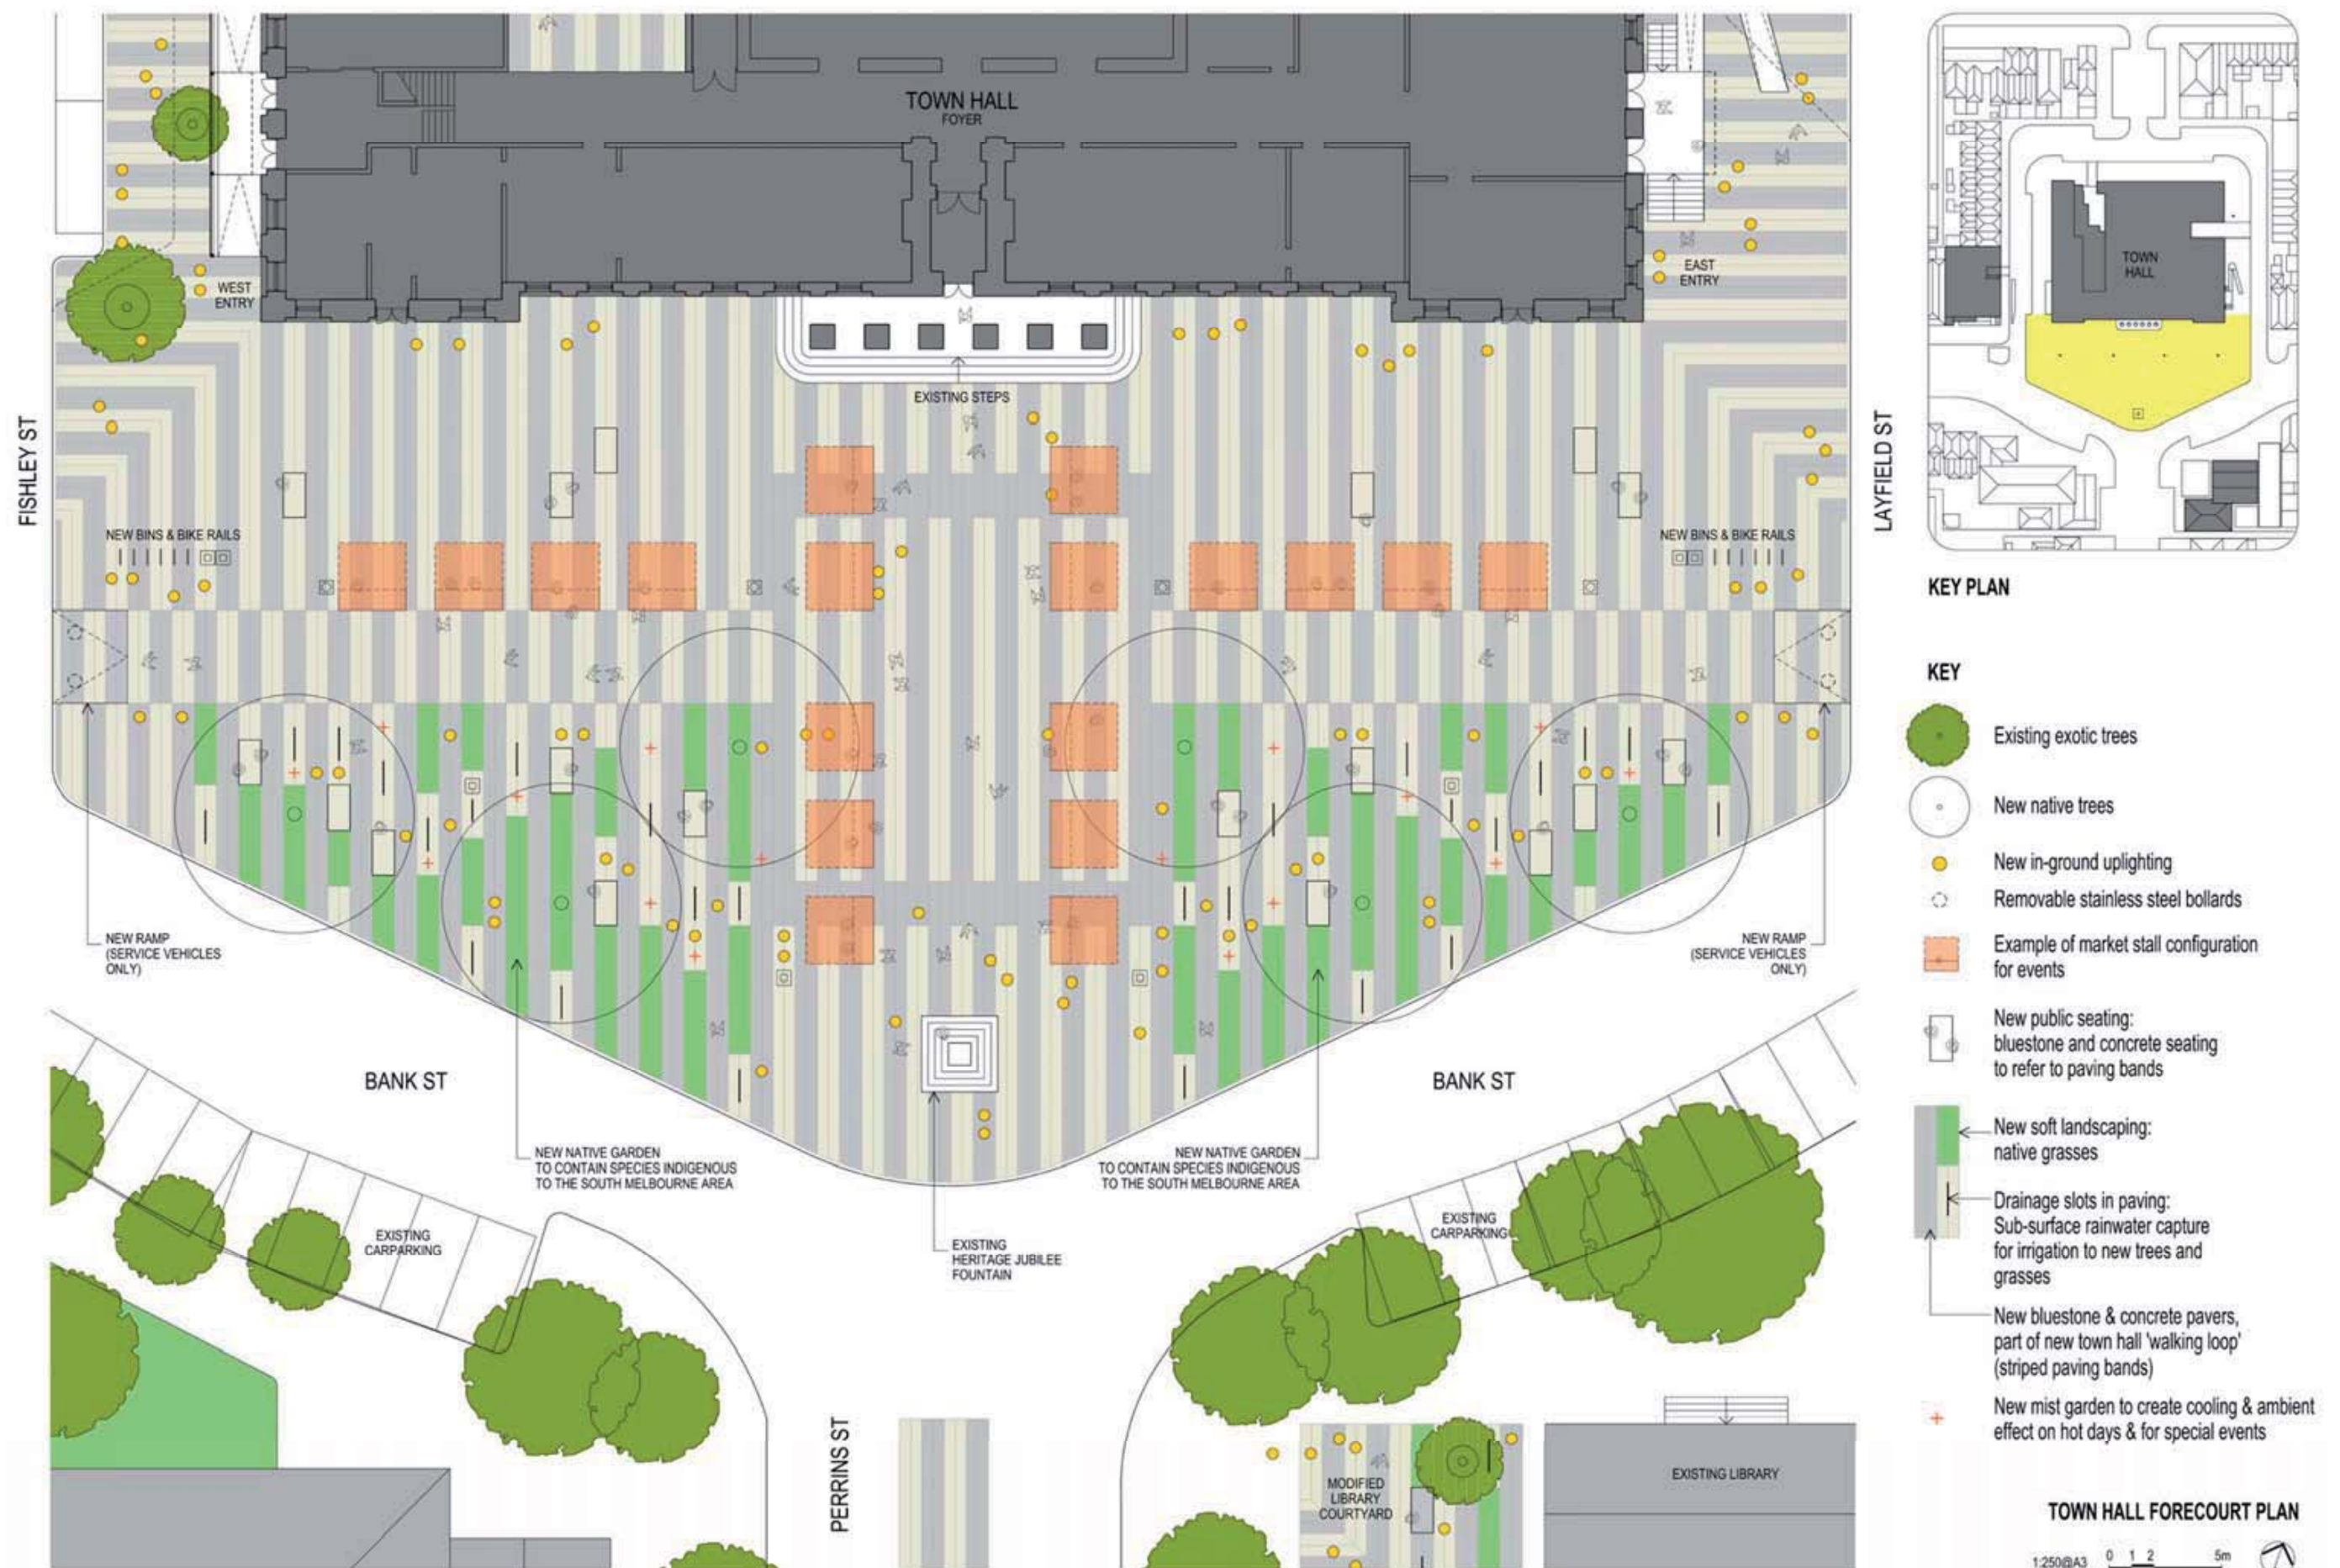

The Town Hall forecourt concept proposes a newly landscaped public square that is highly flexible in accommodating a range of public events.

New bluestone and coloured concrete paving will be formed all around the Town Hall and extend to Fishley, Daly and Layfield Streets. The stripped banding is designed to complement the facades of the Town Hall building and its repetitive architectural features and patterns.

Around the existing heritage Jubilee Fountain will include a series of public seating areas set within generous swathes of canopy and low lying planting. Key east-west views to the Shrine will be maintained and framed by the Town Hall and landscaping.

The proposed concept highlights opportunities for a mist garden to be incorporated and be an interactive and playful feature of the new Town Hall forecourt.
